

Initial Evaluation for
Free
Lung Cancer Screening
at
Peabody City Hall

Tuesday, September 16, 2014

An initial evaluation for
a free Lung Cancer Screening will be held on
Tuesday, September 16
from 11 a.m. - 2 p.m. at
Peabody City Hall, 24 Lowell Street
in the Wiggin Auditorium.

Beverly Radiology Associates and Beverly Hospital
are

offering a free low-dose chest CT screening to individuals who meet the established National Comprehensive Cancer Network's (NCCN) high-risk criteria. Persons between the ages of 50 and 74 who have smoked at least an average of one pack of cigarettes per day for twenty-years, may meet the criteria and qualify for a free screening. To learn if you meet the criteria for the screening, an initial assessment is required and will be held on September 16th. All are welcome, it is not required that you live in Peabody to attend; all are welcome.

Appointments are not necessary and the initial evaluation takes just a few minutes. It is not necessary to be a resident of Peabody to participate.
All are welcome and invited to attend.

Those who qualify for a free low-dose chest CT screening will be provided a date, time and location for an appointment.

While private insurers and the Center for Medicaid and Medicare Services (CMS) do not currently cover low-dose CT lung screening, and most hospitals charge a self-pay of at least \$350. for this screening, Beverly Hospital is determined to help bring awareness and accessibility of this testing to all people at high-risk at no charge.

THE SCREENING DOES NOT OBLIGATE YOU TO RETURN TO A BEVERLY HOSPITAL FACILITY FOR ANY FURTHER SCREENINGS, FOR FURTHER EVALUATION OF ANY FINDINGS, OR ANY OTHER SERVICES THAT BEVERLY HOSPITAL PROVIDES. THIS SAME POINT HAS BEEN EMPHASIZED IN OUR CORRESPONDENCE WITH YOUR REFERRING PHYSICIAN
